YOU CAN ACHIEVE ANYTHING

You can have anything on earth that you want,
once you mentally accept the fact that you can have it.

If you want to be successful,
begin by thinking of yourself as being successful.
The feeling of being successful has to come first.

If you have a deep inner conviction
that you will always have all that you need,
if you actually feel prosperous, it will be so.

The only thing that stands between you
and what you want from life
is simply the will to pursue it
and the faith to believe that it is possible.

Only your mind sets your limits.
